

**Amendments to the Specification**

Please replace the paragraph beginning at page 1, line 12, with the following rewritten paragraph:

The present invention relates to a new and distinct variety of rose plant of the floribunda class which was originated by me as a single plant by crossing the variety 'KORwonder' (unpatented) with the variety 'KORgram' (unpatented).

Please replace the paragraph beginning at page 2, lines 29-30, with the following rewritten paragraph:

Observations made in summer from plants of two years of age grown in a garden environment at Somis, California in January, 2000 - August 2001. The climate in Somis is a typical Mediterranean type climate with warm, very dry summers and cool moist winters. Average rainfall is 300-350 mm falling between November and April. Little or no rain falls from May through October. Winter temperatures range from 0 to 30 degrees Celsius but average 5-8 C at night and 15-20C in the daytime. Humidity ranges from 30-50% year round. Light levels are from 300-3000 foot candles in winter and from 3000-9000 foot candles in summer. The plants were irrigated as needed, usually an inch of water every two weeks from April to October. The plants were fertilized with a cup of 20/20/20 fertilizer in early April and again in early August.

Please replace the paragraph beginning at page 3, line 2, with the following rewritten paragraph:

About 16 to 18 mm long and 8-10 mm in diameter, when the petals start to unfurl.

Please replace the paragraph beginning at page 4 line 2, with the following rewritten paragraph:

Size: Small. Average open size is 60-65 mm in diameter and 16-19 mm. in depth.

Please delete the paragraph beginning at page 4, line 4:

~~Stems: Strength: Normal. Average length is about 15-20 cm.~~

Please replace the paragraph beginning at page 5 line 23, with the following rewritten paragraph:

Quantity: ~~Normal.~~ Compound leaves are present at every node along stems.

Nodes are spaced 35-60 mm.

Please replace the paragraph beginning at page 6 line 10, with the following rewritten paragraph:

Auricle(s) shape, if present: None.

Please replace the paragraph beginning at page 6 line 14, with the following rewritten paragraph:

Pest Persistence Resistance: ~~Not~~No resistance observed.

Please replace the paragraph beginning at page 6 line 29, with the following rewritten paragraph:

Quantity: On main stalks: ~~Few~~18-25 prickles, 3-4 mm long per 150 mm of stem.  
Along the same stem length were 1-3 smaller prickles that were less than 1 mm in length.

Please add the following new paragraph after the paragraph ending on line 27 of page 3:

Diameter: 1-2 mm.

Please add the following new paragraph after the paragraph ending on line 25 of page 4:

Size: Length: 18-26 mm.

Width: 22-26 mm.

Petaloids: Width: 1-3 mm.

Length: 16-20 mm.

Please add the following new paragraph after the paragraph ending on line 19 of page 5:

Stems: Strength: Normal. Average length is about 15-20 cm.

Diameter: 3-7 mm.

Color: Yellow-Green Group 146D.
